PROFESSIONAL SUMMARY

Python Backend Developer with 10 months of professional experience building scalable, production-grade backend systems using Python, Django, and Django REST Framework. Skilled in designing and optimizing REST APIs, PostgreSQL/MySQL database architecture, and SQL query performance tuning. Hands-on experience integrating AI-based face recognition and CCTV/RTSP video pipelines into a live attendance management product. Strong track record of debugging, backend optimization, and delivering clean, maintainable code in Agile team environments. Passionate about solving complex backend and system-integration problems.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, HTML, CSS

Backend Frameworks: Django, Django REST Framework (DRF), Flask

Frontend: React.js, Tailwind CSS, Bootstrap

Databases: PostgreSQL, MySQL, SQLite

AI / Computer Vision: OpenCV, InsightFace, RTSP Streaming, Face Recognition

Tools & Platforms: Git, GitHub, Postman, VS Code, PyCharm, Linux, Render, Netlify, Vercel

Practices: REST API Design, Agile Development, Debugging & Production Support, Query Optimization

PROFESSIONAL EXPERIENCE

Python Backend Developer — Datamoo.ai

11 Months (Current)

Project: FaceViz — AI-Based Facial Recognition Attendance Management System (<https://faceviz.aivapm.com> | <https://base.faceviz.com>)

- Developed and maintained backend modules for FaceViz, an AI-powered facial recognition attendance system, using Python and Django.
- Designed and implemented REST APIs using Django REST Framework to support attendance, employee management, and reporting features.
- Built Punch In / Punch Out workflows enabling real-time attendance capture and automated logging.
- Developed attendance reporting and analytics modules to generate accurate, actionable insights for HR and management.
- Built and maintained Employee Management APIs covering employee records, roles, and attendance history.
- Integrated CCTV camera feeds via RTSP streams into the backend for continuous, real-time video processing.
- Implemented the face recognition workflow end-to-end using OpenCV and InsightFace for accurate identity matching.
- Built an image processing pipeline to handle frame extraction, face detection, and recognition at scale.
- Optimized SQL queries and database schema across PostgreSQL and MySQL to improve backend response times.
- Debugged and resolved production issues, ensuring high system reliability and minimal downtime.
- Enhanced backend performance through code refactoring, query tuning, and API optimization.
- Automated key attendance workflows, reducing manual intervention and improving data accuracy.
- Collaborated with cross-functional teams in an Agile environment, participating in sprint planning and code reviews.
- Maintained version control and collaborative development workflows using Git and GitHub.

Technologies: Python, Django, Django REST Framework, PostgreSQL, MySQL, OpenCV, InsightFace, RTSP, Git

FaceViz — AI-Based Facial Recognition Attendance Management System

- Built a production attendance system combining Django backend services with real-time facial recognition and CCTV integration.
- Designed REST APIs for punch in/out, attendance analytics, and employee management using Django REST Framework.
- Implemented an OpenCV and InsightFace-based recognition pipeline processing live RTSP video streams.

Skills Used: Python, Django, Django REST Framework, PostgreSQL, MySQL, OpenCV, InsightFace, RTSP

PERSONAL PROJECTS

CartGenius | Full-Stack E-Commerce Application

- Built a full-stack e-commerce platform using React.js (Vite) and Django, integrating FakeStoreAPI for product data.
- Implemented JWT-based authentication and REST APIs for secure, seamless data flow between frontend and backend.
- Developed cart management functionality with a responsive, mobile-friendly UI using Bootstrap.

Skills Used: HTML, CSS, Bootstrap, React.js (Vite), Python, Django, MySQL | Live: luxcard.vercel.app

Translator Pro | Web-Based Language Translation App

- Developed a web-based translation application enabling users to translate text across multiple languages seamlessly.
- Built the backend using Python and Flask with MongoDB for data storage; deployed on Render.

Skills Used: HTML, CSS, JavaScript, Python, Flask, MongoDB | Live: translatorpro.onrender.com

Library Management System | Django Web Application

- Developed a Library Management System using Django, MySQL, and Bootstrap with responsive design.
- Implemented efficient book tracking and record management functionality.

Skills Used: HTML, CSS, Python, Django, MySQL | Live: suresh-lms.onrender.com

EDUCATION

Bachelor of Computer Applications (BCA)

Aug 2021 – Jun 2024

Agurchand Manmull Jain College, Mennambakkam, Chennai, Tamil Nadu | CGPA: 8.05/10

CERTIFICATIONS

- Full Stack Python — Besant Technologies (Python, SQL, HTML, CSS, Bootstrap, JavaScript, React.js)
- HTML — Great Learning
- CSS — Great Learning
